As previously announced, the Company is exploring the possibility of obtaining conditional marketing authorization in Europe for the proposed indication of prophylaxis and/or symptomatic relief of inflammatory diarrhea, initially to be studied in a "long-hauler" COVID-19 recovery patient population in Europe (the "COVID-related indication").

New *Innovators with Jane King* Interview with Andreea Porcelli and Lisa Conte

Conte and Porcelli were interviewed again this week on *Innovators with Jane King* regarding long-hauler syndrome in post-COVID-19 recovery patients and Jaguar's plans to explore the possibility of obtaining conditional marketing authorization in Europe to support development and commercialization of crofelemer for the COVID-related indication.

To view the video, click [here](#).

When discussing post-acute COVID-19 long-hauler symptoms during a January 23, 2021 [interview](#) on MSNBC, Dr. Anthony Fauci, the Director of the National Institute of Allergy & Infectious Diseases, commented, "We had a workshop in December that my institute sponsored bringing in experts from all over the country and the world. We're going to make a major investment in research dollars to try and find out the full extent of this... any hints towards what the underlying mechanisms are... what we can do to treat it. We take it very seriously for the simple reason that even if a small fraction, and it appears to be more than just a small fraction of people, have persistent symptoms, when you look at the 24, 25 million people in the United States who've been infected - or be it not all of them have had any symptoms - but even those who have symptoms - and globally, when you have approaching a 100 million people having been infected, this could be something that really could be an issue and that's the reason why we're taking it very seriously."

The terms "long-hauler" and "chronic COVID" refer to COVID-19 survivors who suffer with symptoms which may include gastrointestinal distress (i.e., diarrhea, constipation, nausea, pain), fatigue, brain fog, forgetfulness, cardiovascular effects, and arthritis, for an extended period after recovery. It is theorized that these symptoms may result when the immune system in COVID-19 survivors continues to overreact even though the infection has passed.

Mytesi (crofelemer delayed release tablets), the only oral plant-based prescription medicine approved under U.S. Food and Drug Administration (FDA) Botanical Guidance, is a novel, first-in-class anti-secretory agent which has a basic normalizing effect locally on the gut, and this mechanism of action has the potential to benefit multiple disorders. Mytesi is a non-opiate chloride ion channel modulating antidiarrheal medicine that is approved in the U.S. by the FDA for the symptomatic relief of noninfectious diarrhea in adults with HIV/AIDS on antiretroviral therapy.

About Jaguar Health, Inc. and Napo Pharmaceuticals, Inc.

Jaguar Health, Inc. is a commercial stage pharmaceuticals company focused on developing novel, plant-based, non-opioid, and sustainably derived prescription medicines for people and animals with GI distress, specifically chronic, debilitating diarrhea. Our wholly owned subsidiary, Napo Pharmaceuticals, Inc., focuses on developing and commercializing proprietary plant-based human gastrointestinal pharmaceuticals from plants harvested responsibly from rainforest areas. Our Mytesi[®] (crofelemer) product is approved by the U.S. FDA for the symptomatic relief of noninfectious diarrhea in adults with HIV/AIDS on antiretroviral therapy and the only oral plant-based prescription medicine approved under FDA Botanical Guidance.

For more information about Jaguar, please visit <https://jaguar.health>. For more information about Napo, visit www.napopharma.com.

About Mytesi[®]

Mytesi[®] (crofelemer delayed release tablets) is an antidiarrheal indicated for the symptomatic relief of noninfectious diarrhea in adult patients with HIV/AIDS on antiretroviral therapy (ART). Mytesi[®] is not indicated for the treatment of infectious diarrhea. Rule out infectious etiologies of diarrhea before starting Mytesi[®]. If infectious etiologies are not considered, there is a risk that patients with infectious etiologies will not receive the appropriate therapy and their disease may worsen. In clinical studies, the most common adverse reactions occurring at a rate greater than placebo were upper respiratory tract infection (5.7%), bronchitis (3.9%), cough (3.5%), flatulence (3.1%), and increased bilirubin (3.1%).

More information and complete Prescribing Information are available at Mytesi.com. Crofelemer, the active ingredient in Mytesi[®], is a botanical (plant-based) drug extracted and purified from the red bark sap of the medicinal *Croton lechleri* tree in the Amazon Rainforest. Napo has established a sustainable harvesting program for crofelemer to ensure a high degree of quality and ecological integrity.

Forward-Looking Statements

Certain statements in this press release constitute "forward-looking statements." These include statements regarding the Company's plans to explore the possibility of obtaining conditional marketing authorization in Europe to support development and commercialization of crofelemer for the proposed indication of prophylaxis and/or symptomatic relief of inflammatory diarrhea, and the Company's plan to host an investor webcast on January 27, 2021. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expect," "plan," "aim," "anticipate," "could," "intend," "target," "project," "contemplate," "believe," "estimate," "predict," "potential" or "continue" or the negative of these terms or other similar expressions. The forward-looking statements in this release are only predictions. Jaguar has based these forward-looking statements largely on its current expectations and projections about future events. These forward-looking statements speak only as of the date of this release and are subject to a number of risks, uncertainties and assumptions, some of which cannot be predicted or quantified and some of which are beyond Jaguar's control. Except as required by applicable law, Jaguar does not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances or otherwise.
