### Overview

Jaguar is a commercial stage pharmaceuticals company focused on developing novel, plant-based, non-opioid, and sustainably derived prescription medicines for people and animals with GI distress, specifically chronic, debilitating diarrhea. Our wholly owned subsidiary, Napo Pharmaceuticals, Inc. (“Napo”), focuses on developing and commercializing proprietary plant-based human gastrointestinal pharmaceuticals for the global marketplace from plants used traditionally in rainforest areas. Our marketed drug Mytesi (crofelemer 125 mg delayed-release tablets) is a product approved by the U.S. Food and Drug Administration (“FDA”) for the symptomatic relief of noninfectious diarrhea in adults with HIV/AIDS on antiretroviral therapy and the only oral plant-based botanical prescription medicine approved under FDA Botanical Guidance.

Jaguar was founded in San Francisco, California as a Delaware corporation on June 6, 2013. Napo formed Jaguar to develop and commercialize animal health products. Effective as of December 31, 2013, Jaguar was a wholly owned subsidiary of Napo, and Jaguar was a majority owned subsidiary of Napo until the close of our initial public offering on May 18, 2015. On July 31, 2017, the merger of Jaguar Animal Health, Inc. and Napo became effective, at which point Jaguar Animal Health’s name changed to Jaguar Health, Inc. and Napo began operating as a wholly owned subsidiary of Jaguar focused on human health and the ongoing commercialization of Mytesi, and development of follow on indications for, crofelemer. Most of the activities of the Company are now focused on the commercialization of Mytesi and development of follow on indications for crofelemer and a second generation anti secretory product, lechlemer, that has yet to be approved by the FDA. In the field of animal health, we have limited activities which are focused on developing and commercializing first in class gastrointestinal products for dogs, dairy calves, foals, and high value horses.

We believe Jaguar is poised to realize a number of synergistic, value adding benefits—an expanded pipeline of potential blockbuster human follow on indications of crofelemer, and a second generation anti secretory agent, as well as a pipeline of potential animal health indications for crofelemer—upon which to build global partnerships. As previously announced, Jaguar, through Napo, now holds extensive global rights for Mytesi, and crofelemer manufacturing is being conducted at a multimillion-dollar commercial manufacturing facility. Additionally, several of the drug product candidates in Jaguar’s crofelemer pipeline are backed by what we believe are strong Phase 2 clinical proof of concept evidence from completed human clinical trials.

Mytesi is a novel, first in class anti secretory agent which has a basic normalizing effect, acting locally in the gut, and this mechanism of action has the potential to benefit multiple disorders that cause diarrhea. Mytesi is in development for multiple possible follow on indications, including cancer therapy related diarrhea (“CTD”); orphan drug indications for symptomatic relief of diarrhea in infants and children with congenital diarrheal disorders (“CDD”) and for adult and pediatric patients with short bowel syndrome (“SBS”); and for supportive care for diarrhea relief in inflammatory bowel diseases (“IBD”); diarrhea-predominant irritable bowel syndrome (“IBS-D”); and for idiopathic/functional diarrhea. Additionally, the Company is exploring the conditional marketing authorization regulatory pathway in Europe to support development and commercialization of crofelemer for a proposed indication of diarrhea in acutely infected COVID-19 patients. Subsequent clinical studies may also be conducted in post COVID recovery patients suffering from “long-hauler” syndrome. A second generation proprietary anti secretory agent, lechlemer, is undergoing development for symptomatic relief of diarrhea resulting from cholera. Crofelemer has previously also received an orphan drug designation for treatment of diarrhea associated with SBS.

In October 2020, Napo initiated its pivotal Phase 3 clinical trial of Mytesi for prophylaxis of diarrhea in adult cancer patients receiving targeted therapy. The Phase 3 pivotal clinical trial is a 24-week (two 12-week stages),

randomized, placebo-controlled, double-blind study to evaluate the safety and efficacy of Mytesi in providing prophylaxis of diarrhea in adult cancer patients with solid tumors receiving targeted cancer therapy-containing treatment regimens. Mytesi or placebo treatment will start concurrently with the targeted cancer therapy regimen. The primary endpoint will be assessed at the end of the initial (Stage I) 12-week double-blind placebo-controlled primary treatment phase. After completing the Stage I treatment phase, the subjects will have the option to remain on their assigned treatment arm and re-consent to enter into the Stage II 12-week extension phase. The safety and efficacy of orally administered Mytesi will be evaluated for the prophylaxis of diarrhea in adult cancer patients receiving targeted cancer therapies with or without standard chemotherapy regimens. The assessment of the frequency of diarrhea will be measured by the number of loose and/or watery stools for the Stage I treatment period.

In September 2020, Jaguar launched the Entheogen Therapeutics (“ETI”) initiative to support the discovery and development of novel, natural medicines derived from psychoactive plant compounds for treatment of mood disorders, neuro-degenerative diseases, addiction, and other mental health disorders. The initiative is initially focused on plants with the potential to treat depression and leverages Napo’s proprietary library of approximately 2,300 plants with medicinal properties. According to statistics available from the National Institute of Mental Health Disorders, part of the National Institutes of Health, approximately 9.5% of American adults ages 18 and over will suffer from a depressive illness (major depression, bipolar disorder, or dysthymia) each year.

Field research collaborations conducted in the past by members of the scientific strategy team (“SST”) of Jaguar’s predecessor company Shaman Pharmaceuticals, who are also members of the ETI SST, yielded possible applications for a compound called alstonine. Alstonine is derived from a plant used by traditional healers in Nigeria, and has demonstrated a potential novel mechanism of action for the treatment of difficult to manage conditions such as schizophrenia.

While Jaguar and Napo remain steadfastly focused on the commercial success of Mytesi and on the development of potential crofelemer follow-on indications in the area of gastrointestinal health, the Company believes the same competencies and multi-disciplinary scientific strategy that led to the development of crofelemer will support collaborative efforts with potential partners to develop novel first-in-class prescription medicines derived from psychoactive plants.

Our management team has significant experience in gastrointestinal product development for both humans and animals. Napo was founded 30 years ago to perform drug discovery and development by leveraging the knowledge of traditional healers working in rainforest areas. Ten members of the Jaguar and Napo team have been together for more than 15 years. Dr. Steven King, our chief sustainable supply, ethnobotanical research and intellectual property officer, and Lisa Conte, our founder, president and CEO, have worked together for more than 30 years. Together, these dedicated personnel successfully transformed crofelemer, which is extracted from trees growing in the rainforest, to Mytesi, which is a natural, sustainably harvested, FDA-approved drug available from essentially any pharmacy in the United States.

## **Description of the Issuance of the Warrant to Purchase Common Stock**

### ***Warrant Shares***

On April 7, 2021, the Company entered into an amendment to its equity purchase agreement, dated March 24, 2020 (the “ELOC Agreement”), with Oasis Capital, LLC (“Oasis Capital”), pursuant to which the parties agreed to increase (i) the purchase price per share of Common Stock issuable under the ELOC Agreement from \$0.436 to \$3.00 and (ii) the threshold trading price of the Common Stock for conducting sales under the ELOC Agreement from \$0.5014 to \$3.45 per share. Moreover, such representations, warranties or covenants were made as of an earlier date. Accordingly, such representations, warranties and covenants should not be relied on as accurately representing the current state of our affairs.
